Delicious Koffee

UNIQUENESS IN EVERY ASPECT

Much more than coffee

Based on your mood and likes, you can enjoy Tea, Strong Tea, Filter Coffee, Strong Coffee, Milk and Hot Water with this single machine

Clean Master

The fully automatic cleaning system will ensure the cleanliness of the machine every single day

IOT

Seamless Internet Connectivity for Cup Counts, Brew Counts, Clean Cycle Synchronization and Qr based Consumable Stock Management in cloud.

RFID

Smart RFID-based brewing, which permits only authorized packets to undergo the brewing process

Gorgeous Display

The machine comes with a massive 10.1 inch TFT Display built on Linux.

Smart QR based Inventory

Each coffee packet is equipped with a smart QR code. Scanning this code activates the coffee machine for brewing. This ingenious system ensures that only the designated coffee powder can be used, thereby guaranteeing top-notch quality with every brew

DK PRO

The DK Pro model stands as a testament to our dedication to excellence and advancement. It's a machine that not only brews beverages but also enriches the entire process with cutting-edge technology and exceptional design.

Delicious Koffee

KEY FEATURES

-  Ample Milk Capacity: With an impressive milk capacity of 9 litres (4.5 + 4.5 litres), the DK Pro is designed to serve both small gatherings and larger groups without compromise.
-  Versatile Brewing: This model offers the ability to brew both coffee and tea, accommodating quantities ranging from 50 to 250 grams.
-  Intuitive 10.1 Inch Touch Display: The DK Pro boasts a 10.1 inch touch display, designed to meet industrial standards. This interface simplifies operation and provides an engaging user experience.
-  Flow Reed Sensors: Distinguishing itself from conventional machines, the DK Pro employs flow reed sensors for water level measurement, enhancing accuracy and reliability.
-  Premium Aesthetics: The front panel is expertly crafted using Fiber Reinforced Plastic (FRP), ensuring not only enhanced aesthetics but also durability and sophistication.

Intelligent

in Every Way

IOT

IoT capabilities in DK Pro Machines provide remote monitoring of every aspect of your machine, including drink, brew, and cleaning counts. You can also monitor the counts using a custom date range . Our IoT panel has a spectacular graph that allows you to keep track of the drinks that are most frequently served.

ONLINE DISPENSING

Our device dispenses a drink in a fraction of a second with the press of a single button on your phone. Our touch-less dispensing is unique in that its backend is swift and responsive and consumes extremely little internet speed.

Additionally, our online dispensing system includes an optional Razorpay-powered payment gateway solution that enables payments for your device.

Delicious Koffee

RFID

DK Filter Coffee and Tea vending machine is equipped with RFID. Our machine recognises RFID cards when they are placed on them and sends data to the machine to dispense drinks based on a specific query.

There are four different different options available to dispense a drink

- ☪ Limited Cups
- ☪ Postpaid Cards
- ☪ Prepaid Cards
- ☪ Unlimited Cups

PAYMENT GATEWAY

DK machines are equipped with a built-in payment gateway, enabling users to dispense drinks by making payments. This versatile payment system accommodates various methods, including UPI apps, credit cards, debit cards, postpaid options, and more
